

Download 3cx Configuration Guide

STEP 1: Adding an extension: Log into the 3CX administrative interface and click on the Extensions header, from the left side of the page. Click on the Add Extension link at the top of the loaded page. From the Add Extensions page, enter your Extension Number, name, and a password. Once you have entered your credentials for this extension, please click on the Ok button to continue.

STEP 1: Adding an extension: Log into the 3CX administrative interface and click on Extensions, from the left side of the page. Click the Add button near the top of the loaded page. From the Add Extensions page, enter your Extension Number, Name, and a Password. Once you have entered your credentials for this extension, please click on the OK button to continue.

The following Configuration Guides are intended to help you connect your SIP Infrastructure (IP-PBX, SBC, etc) to a Twilio Elastic SIP Trunk. Be aware, due to the large number of versions, variations, add-ons, and options for many of these systems, the settings you see may differ from those shown in our Configuration Guides.

Bring Your Own Device. While most VoIP providers insist on supplying VoIP device, which usually is locked so it only works with one service provider, with VoIPVoIP, you have the freedom to use virtually any softphone, VoIP adapter, gateway, IP phone, or IP PBX system you choose, as long as it supports the Session Initiation Protocol (SIP).
